

Sakshi Neeraj

DevOps Platform Engineer — Developer Productivity and Agentic AI Automation

sakshi1neeraj@gmail.com — +91 9818541763 — linkedin.com/in/sakshi-neeraj — sakshi-neeraj-portfolio

Experience

Shell – IT Operations Platform Engineer

Aug 2024 – Present

- Manage AWS cloud infrastructure and Kubernetes platforms supporting 40+ Dockerized microservices, maintaining scalable, reliable, and repeatable platform environments using Terraform and Infrastructure as Code.
- Design and maintain CI/CD automation using GitHub Actions, AWS ECR, GitHub OIDC, and Terraform for secure container image build, authentication, artifact management, and continuous application delivery.
- Implemented a parallel deployment strategy that reduced deployment time by 70%, improving release velocity and engineering workflow efficiency.
- Improved platform reliability and operational visibility by implementing Dynatrace Synthetic Monitoring across 7 environments in 3 global regions, enabling engineering teams to monitor application health and service performance.
- Developed and deployed LangGraph-based AI Agents with custom Model Context Protocol (MCP) servers, RAG, and HolmesGPT SRE Agent integrations across AWS, GitHub, and Dynatrace MCPs to automate microservice health monitoring, RCA generation, and incident auto-remediation contributing to 98% SLA for the team.
- Developed Python automation for Databricks SQL Warehouse finance analysis, enabling engineering teams to analyze infrastructure usage and identify cost optimization opportunities through FinOps.
- Led DevSecOps improvements by integrating Wiz container image scanning and software security controls into platform workflows to strengthen application and container security posture.
- Troubleshoot complex infrastructure, deployment, networking, Kubernetes, and application issues across multiple environments while driving root-cause analysis and operational improvements.

Samsung – Intern

Jul 2023 – Apr 2024

- Extracted Music Frequency features from Audio clips using Python Librosa.
- Trained Deep Learning Models of ANN and CNN for music audio classification achieving 90% accuracy.

Centre for Development of Telematics (C-DOT), Govt. of India – Intern

May 2023 – Jul 2023

- Built Python-based SSH automation enabling secure remote connectivity and parallel execution across 5 remote servers.

Genpact – Intern

Jul 2022 – Sep 2022

- Analyzed Data for 500+ employees to identify retention drivers and developed visualization dashboards for Business Leaders.

Skills

Platform Operations & Cloud: AWS, Kubernetes, Docker, Terraform, GitHub Actions, ArgoCD, Helm, Istio Mesh

Observability & SRE: Dynatrace, Prometheus, Grafana, Synthetic Monitoring, SLA/SLI Management, ServiceNow

Software Development and Programming: Python, API Integration, YAML

Systems & Security: Linux, Bash Scripting, DevSecOps (SonarQube SAST, Dependabot SCA), LLD System Design

Agentic AI & GenAI: LangGraph Framework, Model Context Protocol (MCP), RAG, VectorDB, Token Optimization

Certifications

Cloud & Infrastructure: AWS Certified Solutions Architect Associate | Terraform Associate | Kubernetes Cloud Native Associate (KCNA) | Certified Kubernetes Administrator (CKA - in progress)

AI & Data: Azure AI Transformation Leader | Google Cloud Generative AI Leader | AWS AI Practitioner | Databricks Data Engineer Associate

Security & Agile: ISC2 Certified in Cybersecurity | SAE Certified DevOps Practitioner

Achievements

- Recipient of Shell Global Recognition Award for outstanding contributions in DevSecOps.
- Awarded 100% Merit Scholarship for B.Tech in Computer Science Engineering.
- Authored and awarded for IEEE research paper in Artificial Intelligence during undergraduate studies.

Projects

News Authenticity Detection Platform – ML Containerized Deployment on AWS EKS

- Engineered an ensemble NLP system (Logistic Regression, KNN, SVM) with tokenization, lemmatization, and vectorization, achieving 91.5% accuracy.
- Containerized application using Docker, exposed REST APIs via Python Flask, and deployed onto AWS EKS using Helm charts with custom ConfigMaps, ReplicaSets, and Services.

Folder Structure Management Agent using Custom MCP Server

- Developed an AI-powered agent using Python and custom Model Context Protocol (MCP) integrations to automate complex file and directory organization workflows.

Real-Time Google Cloud Engine Monitoring Dashboard

- Built Python monitoring pipelines for 10+ GCE instances, persisting metrics into CloudSQL and visualizing via Power BI to enable optimized deployment strategies.

Education

B.Tech in Computer Science Engineering (Data Science Specialization)

2020 – 2024

Amity University – CGPA: 9.16 / 10.0

CBSE Senior Secondary (Class XII): 94.8% — **CBSE Secondary (Class X):** 93.4%
