

Sakshi Neeraj

DevOps Platform Engineer — Developer Productivity Automations

sakshi1neeraj@gmail.com — +91 9818541763 — linkedin.com/in/sakshi-neeraj — sakshi-neeraj-portfolio

Experience

Shell – IT Operations Platform Engineer

Aug 2024 – Present

- Manage AWS cloud infrastructure and Kubernetes platforms supporting 40+ Dockerized microservices, maintaining scalable and reliable platform environments using Terraform and Infrastructure as Code.
- Implemented a parallel deployment strategy that reduced deployment time by 70%, improving release velocity and engineering workflow efficiency. Design and maintain CI/CD automation using GitHub Actions, AWS ECR, GitHub OIDC, and Terraform for secure container image build, authentication, artifact management, and continuous application delivery.
- Improved platform and operational reliability and operational by implementing Dynatrace Synthetic Monitoring across 7 environments in 3 global regions, enabling engineering teams to monitor application health and service performance.
- Developed and deployed LangGraph-based AI Agents with RAG and custom Model Context Protocol (MCP) servers of AWS to automate microservice health monitoring and RCA generation contributing to 98% SLA for the team.
- Developed Python automation for Databricks SQL Warehouse finance analysis, enabling engineering teams to analyze infrastructure usage and identify cost optimization opportunities through FinOps.
- Led DevSecOps improvements by integrating Wiz container image scanning and software security controls into platform workflows to strengthen application and container security posture.
- Troubleshoot complex infrastructure, deployment, networking, and application issues across multiple environments

Samsung – Intern

Jul 2023 – Apr 2024

- Extracted Music Frequency features from Audio clips using Python Librosa.
- Trained Deep Learning Models of ANN and CNN for music audio classification achieving 90% accuracy.

Centre for Development of Telematics (C-DOT), Govt. of India – Intern

May 2023 – Jul 2023

- Built Python-based SSH automation enabling secure remote connectivity and parallel execution across 5 remote servers.

Skills

Platform Operations & Cloud: AWS, Kubernetes, Docker, Terraform, GitHub Actions, ArgoCD, Helm, Istio Mesh

Observability & SRE: Dynatrace, Prometheus, Grafana, Synthetic Monitoring, SLA/SLI Management, ServiceNow

Software Development and Programming: Python, API Integration, YAML

Systems & Security: Linux, Bash Scripts, DevSecOps (SonarQube SAST, Dependabot SCA), LLD System Design

Agentic AI & GenAI: LangGraph Framework, Model Context Protocol (MCP), RAG, VectorDB, Token Optimization

Certifications

Cloud & Infrastructure: AWS Certified Solutions Architect Associate | Terraform Associate | Kubernetes Cloud Native Associate (KCNA) | Certified Kubernetes Administrator (CKA - in progress)

AI & Data: Azure AI Transformation Leader | Google Cloud Generative AI Leader | AWS AI Practitioner

Security & Agile: ISC2 Certified in Cybersecurity | SAFe Certified DevOps Practitioner

Achievements

- Recipient of Shell Global Recognition Award for outstanding contributions in DevSecOps.
- Awarded 100% Merit Scholarship for B.Tech in Computer Science Engineering.
- Authored and awarded for IEEE research paper in Artificial Intelligence during undergraduate studies.

Education

B.Tech in Computer Science Engineering (Data Science Specialization)

2020 – 2024

Amity University – CGPA: 9.16 / 10.0

CBSE Senior Secondary (Class XII): 94.8% — **CBSE Secondary (Class X):** 93.4%

Projects

News Authenticity Detection Platform – ML Containerized Deployment on AWS EKS

- Containerized an ensemble NLP system with Docker and Python REST APIs achieving 91.5% accuracy. Deployed the microservice onto AWS EKS using Helm Templates containing custom ConfigMaps and ReplicaSets.

Real-Time Google Cloud Engine Monitoring Dashboard

- Built Python monitoring pipelines for 10+ GCE instances, persisting metrics into CloudSQL and visualizing via Power BI to enable optimized deployment strategies.
